Nottingham University Hospitals 
NHS Trust

Band 6 Orthotist
Nottingham University Hospitals NHS trust
9 Month maternity cover, full time
Salary: £37,338-£44,962 per annum
Closing Date: 26/09/2024

Job overview

An exciting opportunity exists for an Orthotist, with post-graduate experience, to join the in-house Orthotics department at Nottingham University Hospitals NHS Trust. This position is a full-time, 9 month, fixed term contract to cover maternity leave. It is primarily a clinical role treating both inpatients and outpatients in a variety of clinics.

Main duties of the job

The department is set in an acute trust with a major trauma unit and spinal centre, this means there is a diverse and often complex patient group. There is a range of outpatients' clinics, with appropriate assessment time and dedicated ward time for inpatient work. There is a fully equipped in-house workshop with 6 technicians to support clinical staff.

Multi-disciplinary teamwork is thoroughly encouraged and the department has numerous multi-disciplinary and joint Orthotist clinics. These include Diabetic Foot, Neurology, Paediatric, complex footwear and Spinal.

All Orthotists have weekly in-service training sessions, protected CPD time and are encouraged to participate in service development, both within the department, and in the therapies and rehab pathway.

Working for your organisation

Nottingham University Hospitals is one of the UK's largest teaching hospitals. The Orthotics department aims to provide the most efficient and effective care to patients, to set new standards in orthotic treatment and to constantly improve to meet the demands of our users. The department has a strong focus on staff well-being, with regular supervision, access to educational courses and time out for well-being sessions.

The successful candidate will form part of a team of 10 Orthotists, 2 assistants, 6 technicians and 6 administrators. There is an on-site workshop with CAD-CAM scanner and milling machine. The clinicians have access to a Rodin and I-pad scanner. It is an innovative team who work closely with orthotic companies and the wider Trust to develop new ways of effectively treating patients. The majority of clinical activity will be at the Queens Medical Centre Campus, in a new custom build department and City Hospital campuses, although work in the community may be required.

Applicants must be HCPC registered and preferably members of BAPO.

If you would like to join this friendly, well-supported, dynamic orthotic team at NUH and gain experience working in a busy acute hospital, as well as

develop your leadership skills, we would welcome your application for the above post.
