

# In Focus

**Finn Martin-Dufaur**

Prosthetic/Orthotic Technician

## What is the best thing about your job?

The best thing about my job is being able to use my skills to enable people to live a fuller life, playing my own small role in making life easier for those who this service is vital.

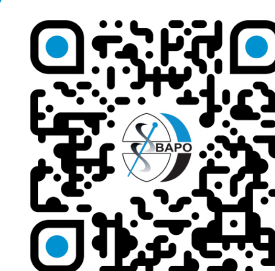

## Describe your job in three to five words

Fulfilling, Frenetic, Attentive

## What advice would you give other people interested in your role?

Approach everything with an open mind. I came into this field as an apprentice with no previous experience. At the start trying to take on all the jargon and new information felt overwhelming, but it becomes second nature. I would wholly recommend becoming a Technician to anyone with an artistic eye and the desire to be able to improve lives with their skills.
