

Inspired by the
PARALYMPICS?

Focus on

Ian Talbot

Clinical Lead Prosthetist/Orthotist
at Dorset Orthopaedic Ottobock

I practice as both a Prosthetist and an Orthotist. Having a patient come through the door in a wheelchair and being able to walk out the door after a period of prosthetic rehabilitation has always been the most rewarding part of the job.

I have worked with a range of patients over my career from small children and the elderly, to paralympic athletes.

I have worked with the worlds most sophisticated upper limb powered prosthesis available for amputations of the whole arm.

I am part of a team that supports a range of Paralympic athletes.

The challenges when working with high achieving athletes is the drive to optimise the fit and comfort of the prostheses or orthoses whilst ensuring the device is lightweight and aerodynamic in its design and manufacture.

Over the years it's been very rewarding welcoming the ambassador's home with their haul of world championship titles as well as gold, silver and bronze Olympic medals.

Could **YOU** be a
**Prosthetist/
Orthotist?**
