

SCIENCE

Do you know studying **science GCSE** and **A level** can help you access a course on **prosthetics and orthotics**?

This subject helps with a career as a **Prosthetist and Orthotist** because you can apply your knowledge of:

- Forces and biomechanics
- Weight limits and torques
- Anatomy and Physiology
- Pathology – understanding when the body goes wrong
- Material science and how the body interacts with different materials

For more information about a career in prosthetics and orthotics, scan the QR
