

Today you were seen by an

Orthotist

Orthotists are experts in gait analysis and engineering solutions. They treat people with problems and conditions of the neuro, muscular, and skeletal systems. Their qualifications make them competent to design, manufacture and provide orthoses (such as insoles, braces, splints, callipers, footwear, spinal jackets, and helmets).

They enable people to mobilise, eliminate gait deviations, reduce falls, reduce pain, prevent, and facilitate the healing of ulcers, and help people recover from or avoid injury or live with lifelong conditions.

If you are interested in a career in orthotics or you know someone who may be interested, you can find out more at www.bapo.com, scan the QR code, or email careersinpando@bapo.com
