

## Clinical Lead Prosthetics NHS Greater Glasgow and Clyde

NHS Greater Glasgow and Clyde is one of the largest healthcare systems in the UK employing around 40,000 staff in a wide range of clinical and non-clinical professions and job roles. We deliver acute hospital, primary, community, and mental health care services to a population of over 1.15 million and a wider population of 2.2 million when our regional and national services are included.

WestMARC prosthetic service at QEUH Campus is looking for a dynamic, highly motivated HCPC registered prosthetist to join our prosthetics team as prosthetic lead. The successful candidate will head the West of Scotland consortium prosthetic service, consistent with NHS GG&C core values of respect, fairness, quality, and working together.

Through collaboration with others, in particular prosthetic MDT and the Scottish Specialist Prosthetic Service, they will be expected to develop and deliver a vision for the service that will be required to adapt to an ever-changing healthcare environment; necessitating experience in service development, quality, financial awareness and managing projects.

We are looking for a candidate who will motivate and inspire others both within prosthetics and the wider WestMARC team, act as a role model, and provide a consistently high-quality service. The post holder will be the Greater Glasgow and Clyde professional lead for prosthetists. Further information is provided in the attached role profile. Applications are welcomed from suitably qualified candidates with a passion for improving prosthetic provision and developing innovative services.
